

Feedback Paul & Rose – Midterm Assessment – Tuesday April 25th 2023

Feed-up – What is the student working towards?

Completing the portfolio with a summary/conclusion/reflection of all the research methods used.

Feedback – Where is the student now?

Write a short summary for the portfolio with conclusion/reflection and recommendation. Consider that you write down why you have chosen for this method and how you have done this research, the “how?”. We want to see the evidence in your portfolio. No need for the whole process description. For LO2 be aware of whom you ask the information, a stakeholder is not the target audience. If you use the C4 model, take all the steps for yourself. Don't divide them separately between team members in to steps.

Feed-forward – How does the student get to the desired situation?

Nice process, you are already a good way. With the group project, you should be able to have enough evidence for all the learning outcomes.
