

Before we went to the Schoolplein14, we wrote out our results from the Cruyff Court on a whiteboard to see what came out of the interviews and observations. Because of these observations, we could see where the key differences lie between the Cruyff Court and the Schoolplein14 and plan our approach for the interview accordingly.

Schoolplein14 visit(observation and interviews with parents/child)

We physically went to a Cruyff schoolplein 14 at De Klimboom. Over there, we asked a few questions to teachers, children and parents.

The teachers were really proud of the school and of the students. Particulary Gacpo, a professional football player that went to school there when he was young.

The parents were satisfied with the schoolplein14, they said that it was nice and fine and that it didn't need anything else for the kids.

The kids said that the schoolplein was nice, and they liked the greenery. They wanted the schoolplein to be more luxurious, and they wanted the greenery to be protected better. They also would like a hockey field, since a lot of the hockey sticks were broken, and they didn't have a spot to play. They would like a hockey field with artificial grass, but the grass should not be too high.

It was raining outside, but for the children, this didn't matter. They were playing like it wasn't, running around and having a good time.

13:40-15:20 (schoolyard14)

Students in class:

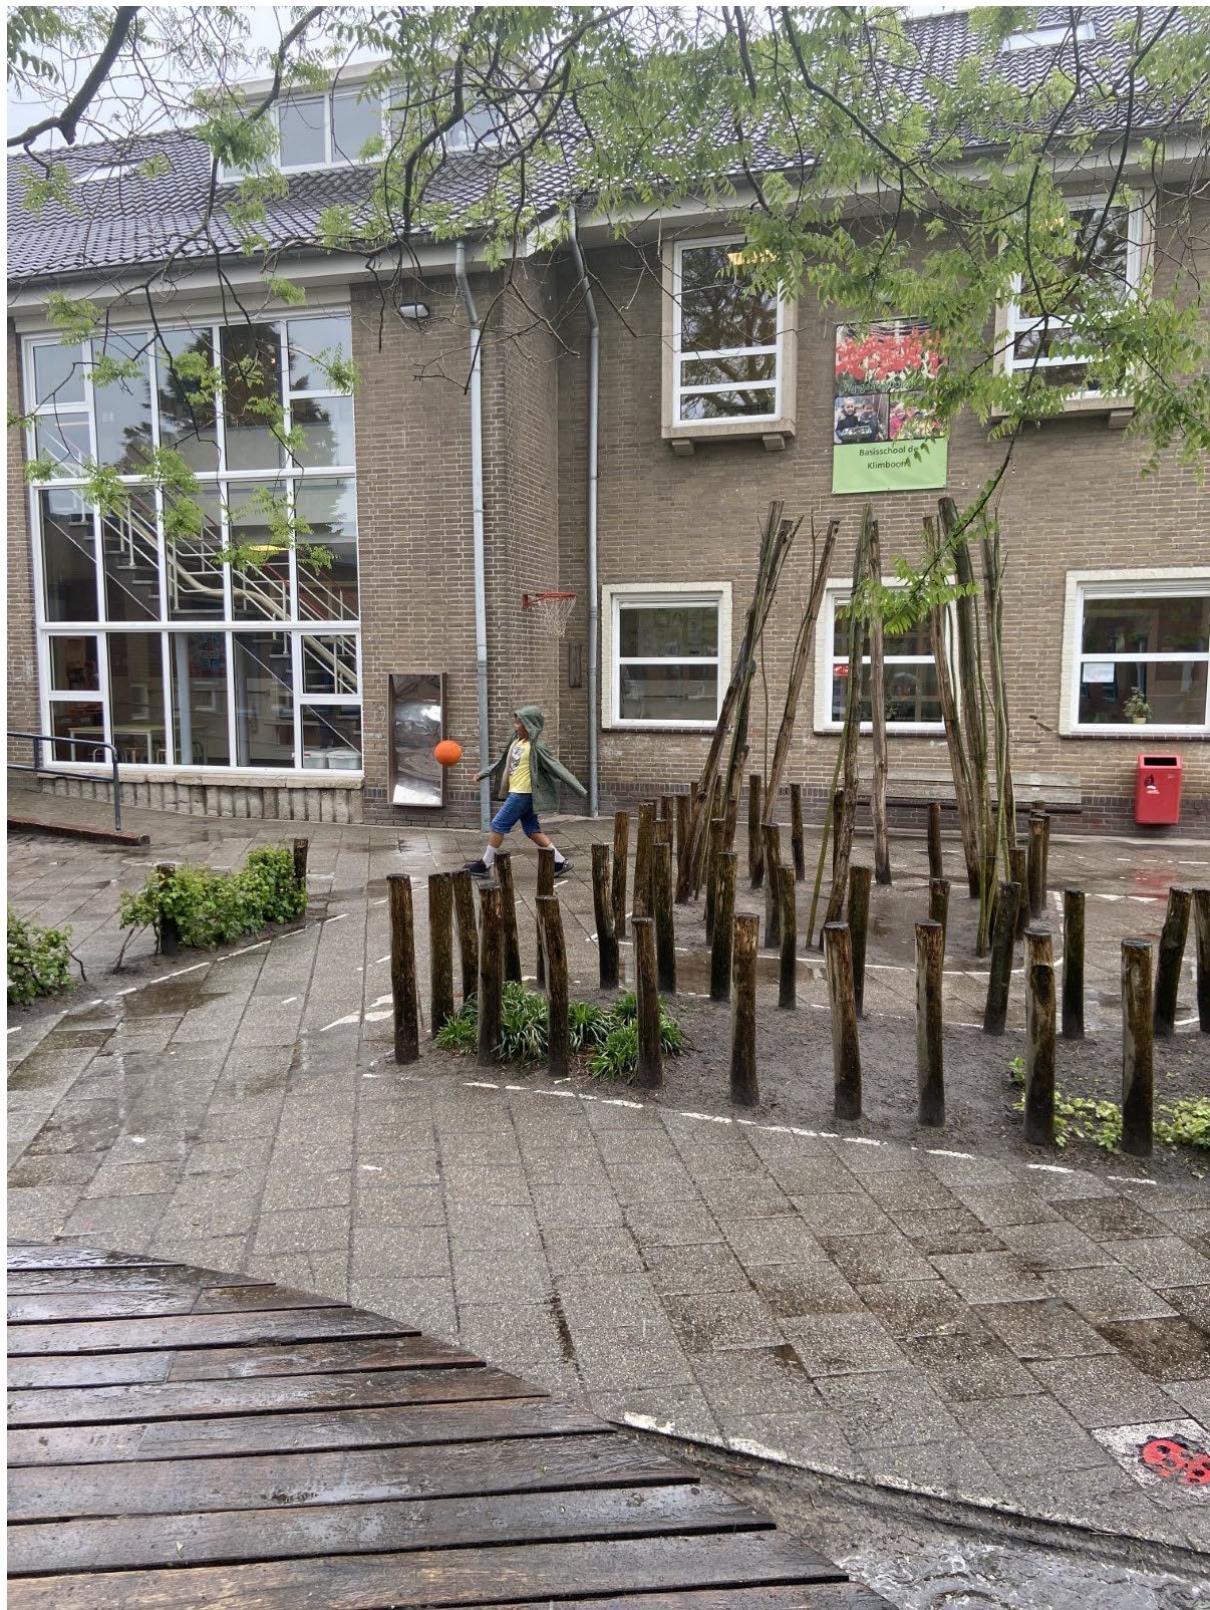

Weather: rainy - moderate rain

Observation: No students were outside. (Probably class period)

Parents are outside the school with umbrellas waiting for their children to leave class; there is no place to take shelter from the rain.

After class:

Weather: rainy - moderate rain

Observations:

1. the ages of the students were different (kindergarten and elementary school students).
2. the dismissal times of these students are the same, the teachers are busy, and many students are outside;

3. Even though it was raining, students still played on the slide and ran outside. but do not play soccer;
4. all students will play outside.
